Review of: "Wound-healing activity of Laportea decumana leaf extract in a polymicrobial-infected wound model in rats"

Farnaz Sadat Fattahi[1]

1. Isfahan University of Technology, Iran, Islamic Republic of

1. Add some specific data to the abstract section. 2. Check the article grammatically. 3. In a separate section in the introduction, Laportea decumana Leaf Extract should be fully compared with other extracts used as wound healing mats, and the advantages of this material should be expressed in relation to other plants. 4. Add some proper references like: ⊠ Poly (Lactic Acid) Nanostructure mats as potential wound dressings ⊠ Investigation into the Effects of Nano-fibrous Wound Dressings on the Wound Healing Process in Animal Models
