Peer Review

Review of: "Valorization of agro-industrial residues into nano-fertilizers: Review on advances in green synthesis"

Farnaz Sadat Fattahi[1]

1. Isfahan University of Technology, Iran, Islamic Republic of

1. **Some schematic figures should be added to the different sections.**
2. **Some proper references must be added to the "Significance of nano materials" Section like :**

- **Poly (lactic acid) nanofibres as drug delivery systems: Opportunities and challenges.**
- **Release mechanisms for profen-loaded nanofibers: Challenges and opportunities**

1. **Some specific data should be added to the abstract.**
