# Review of: ""Advances in Smart Polymeric Materials for Tissue Engineering and Regenerative Medicine: Challenges, Innovations, and Future Perspectives": A Review"

**Farnaz Sadat Fattahi**[1]

1. Isfahan University of Technology, Iran, Islamic Republic of

1. Add keywords to the text. 2. The content should be categorized and numbered regularly. 3. Choose a suitable title for each part. 4. Complete the introduction section. 5. The appropriate schematic figures should be added. 6. The conclusion part should not be referenced. 7. Add some proper references like: Nanoscience and nanotechnology in fabrication of scaffolds for tissue regeneration.
