Thank you for the opportunity provided to review the paper. The research topic on the use of shopping bags is quite interesting. However, the urgency for conducting this research needs to be explained clearly. Additionally, the risks arising from the issues at hand need to be objectively outlined.

The research data was obtained in 2020; how relevant is it to the current situation? Is it still applicable? The author needs to explain this.

As scientific studies require strong references, the author can further elaborate on the references adopted in creating the questionnaire.

In the findings section, there are several hypotheses that have been rejected. The author needs to provide deeper clarifications within the context of the study's objectives.

The explanation in the conclusion chapter of this paper is very brief and tends to be a summary of the research findings; a comprehensive conclusion from the paper is not yet evident. The contribution of the paper to both academic and practical aspects is not apparent.
