Potential competing interests: No potential competing interests to declare.

Timely important research area and most of the parts of the article are properly articulated.

The following comments are given to improve further.

Better to remove the word from the title "Exploring" and use "examining."

Out of several factors, why did you select only three - SI, PEOU, and PU? Need to give proper justification. It should be based on the context (Malaysia, ) or any other features specific to the selected universities.

Explain briefly how you decided on a sample size of 450. What about the population of the study?

Add a brief explanation about the education system of Malaysia. What is the minimum age or qualification to enter into a university to pursue a bachelor's degree? Around 82% of respondents have a degree. Are they all local? Explain briefly to improve the readability.

All the best!!
