# Granulicatella elegans

National Cancer Institute

## Source

National Cancer Institute. *Granulicatella elegans*. NCI Thesaurus. Code C111204.

A species of facultative anaerobic, gram-positive, cocci shaped bacteria assigned to the phylum Firmicutes. This species is non-motile, non-spore forming and catalase and oxidase negative. *G. elegans* is commensal, being found in normal human oral flora, but may be associated with infective endocarditis.
