

# Review of: "Monkeypox among linked heterosexual casual partners in Bayelsa, Nigeria"

Ebot Walter Ojong

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

**TYPE:** Suitable for a case series since study is largely description of cases. The sample size, 7 is small for variables like mean, standard deviation etc, ranges are appropriate.

**METHODS:** Line six- The study was approved by the ethical committee of the NDUTH, kindly provide reference number or appendix of this document

According to the NCDC guidelines (provide reference number, also include this reference in the reference list.

**RESULTS:** Lines 10 and 11- Use lower case for diabetes mellitus, syphilis

Case one: she was referred to 'our hospital, better to mention the hospital name, rather than personalizing with the use of 'our'

Case two: Sexual history incomplete

Table 1, time interval between sexual contact and first symptom should be written as time interval between sexual contact and first symptom (days), remove days after each number, 7.3.2 etc

**REFERENCES:** Include reference for NDDC Guideline
