Potential competing interests: No potential competing interests to declare.

1. It is better to include some points about radiation patterns in the abstract.
2. The Introduction part is too lengthy. Try to reduce it.
3. Add some recent papers related to directional UWB antenna design in the introduction.
4. How is the directional radiation pattern achieved in the proposed antenna??
5. Give an explanation about the design principle of the proposed antenna.
6. Already, many antenna designs are available in the literature providing a directional radiation pattern in the entire UWB frequency range. Please discuss in detail the novelty of the proposed antenna design.
