Financial behavioural opportunity

Behaviour Change Intervention Ontology (BCIO)

Source

Behaviour Change Intervention Ontology (BCIO)

Definition: A that involves the person having sufficient financial resources.

Informal definition: Characteristics of a person's environment that involve the material resources available to them and influence the person's ability to enact a behaviour.

Comment: As 'financial behavioural opportunity' will involve some physical monetary entity (e.g., money borrowed from someone), it is a physical behavioural opportunity. While financial resources (e.g., money) have intrinsically social dimensions, the 'financial behavioural opportunity' does not involve a social aspect.

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to

alternative definitions. In those cases we include a curator note.
