

# Review of: "A Review of the Risks of Copper Foil Manufacturing Plants. A New Facility in Catalonia, Spain"

Thanigaivelan Rajasekaran

**Potential competing interests:** No potential competing interests to declare.

The review article is written well, and I would like to see minor revisions in the current manuscript.

The authors should include recent literature in the introduction.

The objective of the research should be concise and comprehensive.

Compare the literature and elaborate on the suggestions and solutions in the discussion part.

Rewrite the conclusion and make it bullet points; it is written in a generic way.
