The results obtained in the paper are publishable, subject to some necessary changes. The techniques used to solve the problem are standard with some novelty, and the results obtained are correct. However, there are some points that need to be further clarified before its final acceptance for publication:

1. The motivation for the study should be further emphasized; particularly, the main advantages of the results in the paper compared with others should be clearly demonstrated.
2. English should be further improved, since the paper has some spelling and grammar errors. Also, the paper has some editing problems.
3. The example section needs to be further expanded, including some remarks to show the effectiveness and efficiency of the proposed method compared with others.
