Review of: "From Turing to Transformers: A Comprehensive Review and Tutorial on the Evolution and Applications of Generative Transformer Models"

Anna Bryniarska[1]

1 Technical University of Opole

Potential competing interests: No potential competing interests to declare.

Well-written article, quite extensive, especially in the history part. The development of neural networks in the context of Transformers is well described.

You can focus more on practical examples and ethical issues. '5.3. Ethical Considerations in Text Generation' is realy short.
