Potential competing interests: No potential competing interests to declare.

- 1- Abstract expects to view a problem, then produce suggestions to solve it.
- 2- Authors must focus on the advantages of using Zipf's dimension and Zipf's order, which I did not find.
- 3- Author does not explain the software used to analyze the parameters, or the volume and structure of data used in this paper.
- 4- Figure 1, X-axis needs to be defined.
- 5- Figure 2 needs to be clearer.
- 6- All paragraphs need to use the justify feature.
- 7- All the numbers in figure 6 are not clear, need to be rewritten.
- 8- The conclusion paragraph needs to explore the significant results.
