Potential competing interests: No potential competing interests to declare.

The topic is well-timed and interesting, but I think some changes are required. This paper needs a clear structure of an academic paper. The abstract is meaningless and not systematic. The research objectives and methodology are unclear. The research background not sufficient. You can focus on resilience rather than discussing the differences between sustainability and resilience. Some charts and diagrams could be added so the readers can better understand the idea. There are some paragraphs without references.
