**Potential competing interests:** No potential competing interests to declare.

The author expresses in a short commentary a view on the WHO Framework Convention on Tobacco Control (FCTC) strategy. It is based on the Swedish strategy - and that of other countries - which has achieved a significant reduction in tobacco prevalence in these nations. It highlights the complete lack of vision regarding Harm Reduction strategies, along with a failure to assess various nicotine delivery methods (vaping, heated tobacco, etc.).

I believe the author should review the references and add the date of access to web materials.
