Potential competing interests: No potential competing interests to declare.

Abstract needs to be restructured to reveal major contribution to knowledge.

How efficient are different modeling methods, and management tools, remote sensing, field surveys, modeling methods, and optimization techniques in saltwater intrusion (SWI)?

Can you provide specific examples or case studies where the modeling methods and management tools have been applied successfully?

The introduction and literature review need rephrasing to avoid plagiarism.

What is the novelty and major contribution to knowledge of this research?

Methodology and discussion require drastic improvement.

Improve your analysis, results, and discussion. Clarity and precision are paramount in result presentation.

Check through, cite, and list all your references properly. Also, add recent references from 2022-2024.

Proofread and remove all grammatical errors. All tables must be discussed and put properly.

Insert recommendations that can assist further studies.
