

Review of: "Towards Responsible AI-Assisted Scholarship: Comparative Assessment of Generative Models and Adoption Recommendations"

Sohail Sarwar

Potential competing interests: No potential competing interests to declare.

Famous Generative models have been compared

Quantitative scoring and qualitative analysis assesses specialized capabilities of candidates

Extensive validation to mitigate risks with transparency and benchmarking has been discussed

It can be helpful in establishing baseline knowledge on generative AI models.

Potential Improvements

- Abstract may highlight the actual context and research outcomes
- Theme of research be highlighted other than comparison of generative models (Claude, LaMDA, Sydney and Galactica)
- Contribution of authors be furnished (as a framework at least)
