# Rhabdoid Tumor

National Cancer Institute

## Source

National Cancer Institute. *Rhabdoid Tumor*. NCI Thesaurus. Code C3808.

An aggressive malignant embryonal neoplasm usually occurring during childhood. It is characterized by the presence of large cells with abundant cytoplasm, large eccentric nucleus, and a prominent nucleolus and it is associated with abnormalities of chromosome 22. It can arise from the central nervous system, kidney, and the soft tissues. The prognosis is poor.
