Potential competing interests: No potential competing interests to declare.

Thank you for the opportunity to review the manuscript. Although the topic is of great interest to the journal, there are several concerns that should be addressed.

Contributions of the study should be discussed in the introduction.

The research objective is "to understand the importance of Malaysian SMEs in grasping the opportunities embedded in the existence of the digital economy". However, in the literature review, there is no discussion about Malaysian SMEs.

In the discussion, there should be a direct link with the research questions stated in the introduction.

In Section 4, what innovative measure should be adopted? Some examples should be provided, at least. Otherwise, the implications of the study are vague and generic. Are they policy implications and/or managerial implications and what are they?
