Firstly than you very much for reconsidering myself for re-evaluation of the manuscript.

While going through the following points I am raising here -

1. The abstract is elaborative but not concised. Please follow the previous review comments on abstract correction.
2. Introduction and literature review are now almost ok. Authors should check the every cited references before final proof and final editorial decision.
3. The conceptual diagram of the methodology is ok. But, mention the sources of images of Site-A,B,and C.
4. As I am going through, here the two points indicate '5. Conclusion', Need to incorporate the lines- "results achieved... the concept of Dalan" and Figures 4-7 into the Results and Discussion section.
5. Mention the English synonyms of the regional/local words in a bracket.

Make minor corrections accordingly for further progress of the manuscript. Regards...
