Potential competing interests: No potential competing interests to declare.

This article about Tonle Sap has been studied quite extensively. In the conclusion section, the effects of the increase in the number of hydroelectric dams in the future should be emphasized and precautions for the future should be written. In addition, the Tonle Sap authority (TSA) described in the study should continue future studies at a scientific level. This area must be constantly monitored. Incentives for fishing should continue. Endangered species should be protected. Fishing, flora etc. Scientific data in the field must be followed in the field in the future. These can be written in the conclusion section of the study. The study is publishable.
