**Potential competing interests:** No potential competing interests to declare.

The paper could be written better as it lacks an in-depth literature review and analysis. Even though the title of the article is extremely attractive, it does not do justice to the contents. The paper lacks proper in-text citations, case study integration, and elaboration on technology integration. However, the paper does thorough work in acknowledging the relevance to the English language curriculum and in integrating global issues into the English language curriculum, thereby aligning it with the interconnected nature of contemporary challenges and preparing learners to engage in discussions on topics with global implications.
