# BioCarta

National Cancer Institute

## Source

National Cancer Institute. *BioCarta*. NCI Thesaurus. Code C45727.

A developer, supplier and distributor of reagents and assays for biopharmaceutical and academic research. BioCarta aims to be the leader in the development and commercialization of new technology for functional proteomics by creating an international organization geared towards identifying, acquiring, and commercializing novel products. The BioCarta web site serves as an interactive web-based resource for life scientists. Their web site provides immediate access to existing life science research and integrates new data as it emerges. Broadly, this information falls into four categories: gene function, proteomic pathways, ePosters, and research reagents. BioCarta offers an easy and dynamic forum for information exchange and collaboration between researchers, educators and students. Scientists moderate BioCarta, and the site is open and without restriction or cost to participants. (from biocarta.com/about)
