Thanks to the authors for their work and commitment

In my opinion this article needs some revisions.

Abstract: It is not explained what the abbreviation NS means

Introduction: It's hard to read, needs to be made smoother

Methods: Some information regarding the methodology has been described in the "Results" section. In addition, the language of administration of the questionnaire and how an adequate translation of the questions into the local language was ensured is not specified.

Result: Some information regarding the methodology has been described in the "Results"

Discussion: Some conclusions are not related to the data
