BRD4-Interacting Chromatin-Remodeling Complex-Associated Protein

National Cancer Institute

Source

National Cancer Institute. *BRD4-Interacting Chromatin-Remodeling Complex-Associated Protein*. NCI Thesaurus. Code C26432.

BRD4-interacting chromatin-remodeling complex-associated protein (1560 aa, ~158 kDa) is encoded by the human BICRA gene. This protein may play a role in the regulation of both chromatin remodeling and gene transcription.
