Authors are requested to incorporate the following suggestions for further publishing articles.

1. Methodology of the proposed model must be illustrated by a clear flowchart.
2. The figures are of poor quality, e.g., fig. 7.
3. Add testing photographs.
4. Besides, the writing of the paper, including contributions and methodologies, should be clearer and highlight the innovation of methods & principles.
5. Justify the wt% selected for this composite.
