Potential competing interests: No potential competing interests to declare.

The work "Cruises Italian Tourism: Scenarios and Trends After the Global Pandemic — The MSC Case" is an attempt to explore the possible growth of the sustainable cruise industry in a post-pandemic scenario. I observed the following points for further clarification:

1. As sustainable tourism is an objective in this work, the selection of parameters for sustainability in this sector is missing.
2. Also, the effect of these parameters on the growth of the cruise industry needs to be surveyed first for reliable results.
3. Certain figures are not cited, and data from Figs. 6 and 13 seems irrelevant.
4. Figure quality needs improvement as it is difficult to read graphs and other data due to blurred images.
