

Review of: "Enhancing Supply Chain Management Risk Mitigation: A House of Risk Methodology Applied to Brick Manufacturing in Aceh Besar Regency"

Luciana Gondim de Almeida Guimarães¹

¹ Université Laval

Potential competing interests: No potential competing interests to declare.

There is a lack of methodological detail. Were the risks identified by a questionnaire? Was there no prior identification of possible risks in the literature?

Are the factories used as research sites competitors? Are they part of the same supply chain? What criteria were used to select the respondents? What questions guided the interviews? It is not clear how the research was carried out. There is therefore no possibility of reproducing it.
