Potential competing interests: No potential competing interests to declare.

over all the work is good. The article needs revision before acceptance.

Title of article need to be rephrased.

Abstract: Abstract needs revision. It should clearly explain the objective, method and conclusion. Maximum of 250 words.

Methodology: sampling location can be represented in map. what is the period of sample collection. In WQI unit weight assigned to each parameter is not discussed.

Result: Results must show allowable limits and observed values. It is ambiguous to know whether the results are real or not. some citation could be done to justify your result.

Conclusion: Conclusion must be clearly explained. Explain the sources of pollution, the aquifer properties and available groundwater potential in previous section and conclude the result accordingly.
