First of all, I would like to congratulate you for this beautiful work. This study you have conducted on child sexuality, which is very important today, is a valuable contribution to the literature. Some suggestions for the writer are as follows

- It would be better for the reader if you detailed the summary part of the study. I recommend that the purpose of the research and research questions be mentioned.
- Keywords should be added to the abstract
- The importance of research should be added
- The article needs to be tidied up and shortened a bit for its integrity.
- New and updated sources should be added to the article
- The method used should be presented more clearly in the method section. Content analysis should be explained by citing the source...
- The results should be presented briefly in a way that is easier for the reader to understand.
