Potential competing interests: No potential competing interests to declare.

1. It would help if there are research questions in this systematic Literature review (SLR) so as to provide a clear direction and focus in the article. What do the authors want to find out from their SLR?
2. Perhaps the authors should use a specific model in their SLR such as PRISMA which is used often in these kinds of articles. This way they can also explain inclusion and exclusion criteria for articles used in their review
3. Language is generally acceptable but organisation can be improved. For example, the last paragraphs of sections 4 and 5 (pages 4 and 5 respectively) seem to be out of place and unconnected to the previous paragraph.
