Potential competing interests: No potential competing interests to declare.

My major coment is about the type of manuscript. Why the researchers did not follow a systematic approach, both for search strategy and critical appraisal of papers? This manuscript is rather a narrative one and subjected to various kinds of bias. I strongly recommend a systematic review instead a narrative one.

Minor comments:

Some references are lacking or wrongly cited (e.g. international 2010 in some occasions).

Table 2 may be better by translocating rows and columns.
