Potential competing interests: No potential competing interests to declare.

First of all, congratulations to the authors for their excellent work!

I have a few suggestions for improving the article. First of all:

1-Introduction:

Describe the prevalence of the disease, the justification for the study, and make the importance of the case report more clear.

2-Clinical case: Describe the differential diagnoses, improve the color of the H&E image, and, if possible, its sharpness.

3-Discussion: Describe the differential clinical diagnoses. Some paragraphs of the discussion lack references.

4-Conclusion: Address the scarcity of studies (PUBMED, MEDLINE) in the discussion section.
