

Review of: "Government interference in election administration and lethal electoral irregularities in Africa: Evidence from Nigeria"

Opeyemi Idowu Aluko

Potential competing interests: No potential competing interests to declare.

The paper is interesting.

The authors should restructure the paper. Bring conceptual clarification immediately after the introduction.

The theoretical framework is good but it could be well integrated into the study.

It is the duty of government to organise election but should be neutral is a key takeaway in this study.

I do not think having two types of citations in a paper is good enough...the endnote or APA style.

Thank you
