# Mitosis Inhibitor T 1101 Tosylate

National Cancer Institute

## Source

National Cancer Institute. *Mitosis Inhibitor T 1101 Tosylate*. NCI Thesaurus. Code C151933.

The tosylate salt form of T-1101, an inhibitor of mitosis, with potential antineoplastic activity. Upon oral administration, T-1101 inhibits mitosis, through an as of yet not elucidated mechanism of action, which leads to decreased tumor cell proliferation.
