Potential competing interests: No potential competing interests to declare.

The review highlights a lack of nuanced analysis in the manuscript, specifically in problematizing sustainability and the digital, central to its focus. A more detailed exploration of their interconnections and potential contributions to each other is necessary. Also, the review lacks a comprehensive discussion on how digital transformation aligns with the larger questions of Sustainable Development Goals (SDGs). In order to enhance criticality of this review, it is important to delve into the interrelationship between sustainability and the digital. Addressing the above points would help to improve the quality of the review and contribute significantly to the ongoing discourse on the addressed ideas.

Best wishes always!
