Potential competing interests: No potential competing interests to declare.

Introduction: I can only see references from Ventola, 2015 and Aslam et al., 2018. Please kindly research more works that have been done on your keywords and cite more references. That is the beauty of review paper.

Little or nothing was said/discussed about the plants mentioned in the topic of the review paper. Please do more literature review.

Method: Why were you restricted to PubMed for the review? Explore more research works on the keywords.

Discussion: Why discussion in a review paper? The whole paper was written as a research article not a review work.

My take: please do more readings and write on the abilities of the plants against your selected drug resistance bacteria. I look forward to read your review when published.
