Thank you for the interesting article. The topic of the a conceptual paper, a complex adaptive systems framework for exploring sustainable entrepreneurial ecosystems, is very interesting. The propositions are also very interesting.

Constructive recommendations for improvement:

-Proposition 1b could be clarified, is it an entrepreneur or ecosystem or both that are helped?

-Socially productive / unproductive entrepreneurship and particularly "available rewards" could be further explained. This is very interesting aspect in the article, so in my opinion it would deserve more explanation.
