Potential competing interests: No potential competing interests to declare.

its a good article however some minor corrections needed for make this article more impactful.

Abstract : Background, Methods, Results, and Conclusions are the most common parts of a structured abstract. However, other headings with similar meanings can also be used (eg, Introduction in place of Background or Findings in place of Results).

Introduction: Focus more to the research area.

Literature review: A literature review is a summary of topics and sub topics on a certain subject. It gives you an overview of what we know now, so you can find relevant theories, methods, and research gaps that you can then use in your paper, thesis, or dissertation.

Method: In the section of your paper called "Methodology," you explain how you did your research. This information lets people check to see if your method is correct and reliable. A good method can help the reader believe more in your results.

Finding: Findings can be written down or shown in tables, graphs, or other ways. It's important to put the data in context by relating it to the research question (s). Only share data and results that are important to the study's goal. If you give too much information, it may be hard for the reader to understand.

Format: Please refer to the APA format in citation.

The content all very nice. Congratulations
