

Review of: "The COVID 19 vaccine patent race"

Mario Lukinovic

Potential competing interests: The author(s) declared that no potential competing interests exist.

1. The author presented a complex history of the development of the mRNA vaccine in a very concise and understandable way.
2. Patent is the right to an invention, in this regard, the paper would be even more useful if the author more extensive presented the legal aspects of the patent race for the vaccine against COVID.
3. The paper is good and I strongly recommend it for publication.
