Review of: "Synthesis, ADME, Toxicity, and In Silico Molecular Docking Study of Novel β -Carboline Derivatives as Potential Inhibitor Anticancer Agents"

Vinuta Kamat¹

1. Chemistry, Dayananda Sagar Institutions, Bengaluru, India

Comment 1: With the help of the docking studies, we cannot claim them as 'Inhibitor Anticancer Agents'. Therefore, change the title.

Comment 2: The scheme cannot be used as a graphical abstract. Change the abstract.

Comment 3: AutoDock Vienna is not correct.

Comment 4: Give the docking results in table form.

Comment 5: Mention the solvent percentages for TLC.

Comment 6: The author has to add the H/C analysis results for both 4A and B.

Comment 7: The author has to take care of typographical and grammatical errors.

Comment 8: Provide the spectral data.
