The study is good and well structured. It is up-to standard for publication. Just a few observation especially in the abstract. The authors started presenting the results in the method section and presented conclusion in the result section. Also, the sentence ““This study determined the antimicrobial sensitivity profile of *Staphylococcus aureus*, *Pseudomonas aeruginosa*, and *Escherichia coli* against plants like *Acacia arabica*, *Prosopis juliflora*, *Abutilon indicum*, and *Bryonia laciniola*” ” against is wrong here so replace it with “to plants”.
