Streptococcus massiliensis

National Cancer Institute

Source

National Cancer Institute. *Streptococcus massiliensis*. NCI Thesaurus. Code C124410.

A species of Gram-positive, non-motile, non-spore-forming coccus-shaped bacteria in the order Lactobacillales. *S. massiliensis* is negative for beta-glucosidase, beta-galactosidase, beta-glucuronidase, alpha-galactosidase, urease, beta-glucosaminidase and beta-mannosidase. The species ferments maltose but is negative for fermentation of other sugars. It was originally isolated from a human clinical blood sample.
