FDG-Positron Emission Tomography/Computed Tomography from the Skull Base to Mid-thigh

National Cancer Institute

Source

National Cancer Institute. *FDG-Positron Emission Tomography/Computed Tomography from the Skull Base to Mid-thigh*. NCI Thesaurus. Code C137869.

Positron emission tomography combined with computed tomography of the region encompassing the skull base to the mid-thigh with the use of the contrast agent fludeoxyglucose F 18 (18F-FDG) to enhance the image.
