Potential competing interests: No potential competing interests to declare.

1. Need improvements to the abstract. Abstracts help readers understand the general content of the article so they must contain at least an introduction, goals, methodology, and results
2. This article is seriously lacking in terms of structure, systematization, and research flow. The introduction was not conveyed well, especially the importance of this research. Apart from that, the article also does not contain methodology so the research flow is questionable
3. There is a serious lack of references that strengthen the research
