

Review of: "[Mini-review] Impact on Oral Health of Smoking Cigarettes, Cigars or Hookahs"

Leonie Price¹

¹ Japan Tobacco (Switzerland)

Potential competing interests: I am a current employee of Japan Tobacco International

This mini review aims to elaborate on the effects of tobacco smoking on oral health. Unfortunately, it does not reach this goal. The extensive list of claims outlined in the article is not adequately supported by the cited references. The article is not scientifically written and would benefit from the following improvements:

1. Appropriate referencing throughout the text body should be added.
2. The authors should mention how the cited studies were identified and chosen for the purpose of the article to highlight any possible selection bias.
3. The title should be updated to reflect the content of the article (particularly the inclusion of e-cigarettes).
4. Edit for English.
