Much appreciated for giving me the opportunity to review the paper "A Comprehensive Examination of the Practice of Outsourcing within the Framework of International Business in the Contemporary Era of the 21st Century". I would like to supply some comments as follows:

1. This article needs to be reviewed more and new outsourcing models.
2. It should be used and reviewed in new and recent articles.
3. I suggest that the impact of Industry 4.0 be put into the article.
4. The challenges section needs more expansion.
5. There is no conclusion in the article.
