Dear authors

This study offers a plausible insight into medical students' status of Covid-19.

After a thorough review of the manuscript the following points have been raised:

In the methods section of the manuscript,

Kindly provide an extensive description of all the key elements in the study design.

which sampling technique has been used, the total sample size and how was it calculated.

Clearly state the inclusion and exclusion criteria of the study population,

You need to comprehensively discuss the questionnaire domains as well as the validity of the instrument.
