The paper I have been asked to review is interesting and the results obtained are very promising.

However, some problems should be considered given as follows:

1. The abbreviations should be defined when their full names first are presented.
2. Comparative analysis is missing. It can effectively demonstrate the benefits of your method, which can help readers understand this study better.
3. Please add the research directions in the future.
4. There are some typos and grammar errors. Please proofread this paper carefully.
