General comments:

The paper deals with an interesting research topic and work are appreciable. Good literature review. Article is supported with many good studies. However, I understand the following weakness of the manuscript.

It may be acceptable in the current form for possible publication in QEIOS

Comments:

1. On which basis author decided the sample size of the questionnaire?
2. If there is any short list of questions, can they represent in this manuscript.
3. Kindly add pie charts or some graphs showing the response to the questionnaire study for a better understanding of the researcher & readers.
 - a. (Yes/No, or percentage wise or liker scale wise etc.)
4. Author may explain/represent section-wise/category-wise graphs/pie charts.

Note: **It may be acceptable in the current form for possible publication in QEIOS**

Thank You.
